Integrity Processing Series 14

HAVINGNESS

All valences are circuits are valences.

Circuits key out with knowingness.

This is the final definition of havingness.

Havingness is the concept of being able to reach. No-
havingness is the concept of not being able to reach.

A withhold makes one feel he or she cannot reach.
Therefore withholds are what cut havingness down and made
runs on havingness attain unstable gains. In the presence
of withholds havingness sags.

As soon as a withhold is pulled, ability to reach is
potentially restored but the pc often does not discover
this. It requires that havingness be run to get the benefit
of having pulled most withholds.

Therefore havingness may be run in conjunction with
Integrity Processing but may NOT be used to hide or obscure
the fact of failure to F/N an Integrity Form question.
