HCO BULLETIN OF 28 DECEMBER 1972 R
REVISED 18 MARCH 1973
(Amendment in Italics)

C/S Series 81 - 1

AUDITORS RIGHTS ADDITION

It is the established right of an Auditor to use the exact correction list to repair a specific auditing action, when required.

An Auditor does not have to obtain C/S OK to do an L3B in Dianetics or any other correct list for the Auditing action.

It has come to light that Auditors, whose pc Red Tags at the PC Examiner, are not taking that pc immediately back into session to do the correction list repair action required.

If an Auditor takes the pc back into session immediately after a Red Tag and REPAIRS the session, using the exact correction list and then gets F/N VGIs at Exams, he may be credited with the hours delivered in the earlier session. This rule is only applicable if the Auditor takes the pc back into session and handles with the right correction list on the same day as the original red tag session.

This is in fact completing the session to correct EP by use of the proper correction list and so incurs no stat penalty provided it is done correctly, without delay, and does then F/N at the Examiner.

This is quite different from giving the pc repeated Pc Exams, without further auditing, in attempt to obtain an F/N. Such must not be done as it only harasses the pc. Even if it was just an Examiner goof that upset the pc resulting in a no F/N the Auditor must still take the pc back into session, handle to an honest EP then return the pc for a new examination (with a different Pc Examiner if necessary).

With excellent programming, C/Sing and Auditing, and use of the above in the few cases when needed, 100% F/N VGI ratio is obtainable by any org.

An auditor must have an OK to Audit from Qual for any action, its theory (sometimes forgotten by some orgs), and its correction list before starting that action on his pc.
