Word Clearing Series 46

METHOD 7 DATA

Method 7 is actually required by more people than was originally realized. It is extremely fast and effective in upgrading a person's ability to read. Most people need it. How many people can read out loud flawlessly?

There are two areas of application of M7:

1. It is done on a general text with no specific technological words involved.

This method is used on children or adults with reading difficulties and continuing until they can read fluently. If any difficulty is encountered, cut back the grade level of the reading material to where the person was doing well and take it from there. If the person had difficulty right from the start, get a copy of the first reading book and clean that up, and move forward through the progressive gradient and thus bring the person or child up to the required standard. EP = the person can now read fluently.

2. It is done on a specialized text with technological terms.

In this case, M7 is on the specific text and is continued until the person is reading fluently. The person can then read the text on his own. This does not mean the end of M7 for the person. He can M7 any other area or text. Because a text has been M7'd does not mean it cannot later be M4'd. M4 can locate more misunderstands through its different approach.

The actual applications of the above, as can be seen, are very broad. An org could generate lots of daytime business during holidays by getting in and word clearing children and students and improving their reading.

Persons whose careers involve reading or reading out loud also need word clearing. Actors would have no troubles with a word cleared script.

Watch out for going past an EP on M7. Let the person have his win.

When doing the first type of M7 above, don't forget to follow it with genning in on how to use a dictionary and a simple Grammar Course, per HCOB 21 June 72 "Method 7".

Method 7 Word Clearers are easy to train up and could be used in a special program to clean up misunderstands on book buyers who have taken no service, or Scientologists who buy books and don't read them or who bogged.
