2. Use only the small falls or falls or BDs. The rises will however show where mass lies.
  - A. If A or any of the A Group, and the pc has had an Int RD, do an Int RD Correction List, and handle the reads. (HCOB 29 Oct 71 Amended 31 Dec 71.)  
If the pc has never had an Int RD, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.
  - B. If any of these read, do an L4B on the earliest lists you can find that have not been corrected. Lacking these do an L4B in general. You can go over an L4B several times handling each read to F/N until the whole L4B gives nothing but F/Ns. Handle a Wrong Why or Wrong Indication or Wrong PTS item per C/S Series 78.
  - C. If any of these, handle with 2wc and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 17 F/Ns. On overts and withholds, get what, and E/S to F/N. On out ruds, find which rud and handle. (See GF40RR HCOB 30 June 71 Revised 13 Jan 72.) Feel sad, handle the ARC Break. (Feel sad = ARC Brk of long duration.)
  - D. Rehab releases on each "drug" taken to F/N. Complete the Drug RD per C/S Series 48R after handling all reads on this assessment. If pc has had a Drug RD, do L3RD on it, and handle.
  - E. If any of these, do L3RD and handle according to what is stated to do on L3RD.
  - F. Clean up any protest and inval and rehab to F/N.
  - G. Find out what it is. If Yogi or Mystic exercises or some such 2wc E/S it to first time done, find out what upset had occurred before that and if TA now down do LIC on that period of pc's life.
  - H. If Word Clearing, do a Word Clearing Correction List, handle all reads. If Study errors, 2wc E/S to F/N, and add a Study Correction List to the pc's program.
  - I. False TA is wrong cans. Use HCOBs 24 Oct 71, 12 Nov 71, 15 Feb 72, 18 Feb 72, 29 Feb 72, HCOB 23 Nov 73, all on False TA. Then clean up the bypassed charge with (1) Assess for best read (a) TA worries (b) F/N worries. (2) Then 2wc times he was worried about (item) E/S to F/N. (3) Rehab any overruns due to False TA obscuring F/Ns.
  - J. These are auditor errors. Low TA is generally caused by overwhelming TRs and incomplete actions. A high TA can be caused by an auditor overrunning F/Ns or failing to call them. Or trying to assess through an F/N and mistaking an F/N right swing for a read. An F/N can be obscured and mistaken for a read if Sensitivity too high. These items are all 2wc E/S to F/N. Auditors who made them need Cramming badly or reread.
  - K. Can't have or Hav. Find correct Havingness process and remedy.
  - L. PTS or Suppressed. Check for SP or get a full PTS RD.
  - M. Find out what. Clean up any protest. Rehab to F/N on each (or date to blow, locate to blow if qualified).
  - N. 2wc to find what. Note BD item. If BD item covered by one of these categories handle per instructions. If not just 2wc to F/N and get further C/S instructions for handling if necessary.
  - O. Get pc to tell you about it briefly. If correct then indicate to F/N. Go E/S and indicate it if no F/N on first. If false TA handle per I above.
  - P. INDICATE and 2wc to F/N.
- General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any BD group if you get a BD. If in doubt about what to do, return to the C/S.
