DIANETIC COMMAND TRAINING DRILLS

101 & 102

The most common errors being made by student auditors are forgetting the commands during session and misusing command sequence or procedure or doing odd things because they get nervous. The following drills are added to the Standard Dianetics Course to handle this. The drills must be thoroughly done and checked out star-rated by the Course Supervisor. They are done as the last item on the check-sheet.

TR 101:

NAME: R3-R to a wall.

COMMANDS: R3-R commands including earlier incident and earlier similar commands.

POSITION: Student seated facing a wall.

PURPOSE: To get the student able to give all R3-R commands accurately, in correct order without hesitation or having to think what the next command should be.

TRAINING STRESS: This drill is not coached. The student sits facing a wall with a copy of the R3-R bulletin in his lap. The student gives the commands, in order, to the wall maintaining good TRO and TRI. When the student falters or is uncertain of the next command he re-reads the commands from the bulletin then continues to give the commands to the wall. When the student can confidently give all the commands accurately without any slightest comm-lag, he raises his hand for the course supervisor to give him a checkout.

TR 102:

NAME: Auditing a doll.

COMMANDS: All R3-R commands and standard Dianetics procedure.

POSITION: Student seated at a table with E-Meter and auditor report sheets. In the chair opposite

the student is a doll occupying the position of the pc.

PURPOSE: To familiarise the student with the materials of auditing and co-ordinate and apply the commands and procedures of Standard Dianetics in an auditing session.

TRAINING STRESS: This drill is not coached. The student sets up the E-Meter and worksheets exactly as in a session. He starts the session and runs a complete Standard Dianetics session on the doll keeping full session admin and using all standard procedures of Dianetics.

The drill is passed when the student can do the drill flawlessly with good TRs 0-4, correct procedure and commands, without comm lags or confusion and can maintain proper session admin, including worksheets, auditor's report form, and summary report.
