Integrity Processing Series 5R

INTEGRITY PROCESSING REPAIR LIST

LIST LIR

The rule of Integrity Processing is that it should always end on an F/N. There are various means of obtaining this (Ref BTB 5 Dec 1972 "Procedure"). When it does not F/N however (which includes F/Ning at the PC Examiner) or PC is upset, gets sick, or not doing well after Integrity Processing this list must be used to repair the PC.

This action is a 24-HOUR REPAIR PRIORITY.

To not repair within the 24 hours leaves the person hung with a possible overt, certainly with an unflat (or overruled) action and he is liable to get sick, misemotional or leave a trail of enturbulance and destruction behind him until the matter is handled.

The list is assessed Method 5 and all reading items handled to F/N Cog VGIs. Do not end off on first F/N.

Preliminary step: Ascertain the time of the Integrity Processing to the person's satisfaction. Prefix the questions with "In that Integrity Processing....."
