CANCELS
HCO BULLETIN OF 23 DECEMBER 1972
SAME TITLE

Integrity Processing Series 20

C/S-ING INTEGRITY PROCESSING

Integrity Processing _is_ auditing and _is_ C/Sed.

The C/S ensures Integrity Processing is not entered into a PC Pgm in the middle of another rundown or auditing action. When required it may be entered into a Pgm at a suitable rest point but any current process or rundown in progress on the PC would be completed first. The C/S should not use this to unduly delay Integrity Processing when required as a person witholding overts will not make gains until those overts have been pulled.

The Auditor must be qualified as a Hubbard Integrity Processing Specialist. This is a new tech. Its practitioners must be specialist trained.

Standard C/Sing rules apply. In addition the C/S looks for the following key points:

1. Any non-sequitur F/N on some other subject. Ensures that each question is F/Ned on the subject being asked about. This is the primary thing the C/S inspects.

2. Check that each reading question was taken to an F/N.

3. Check for correct use of the Integrity Processing correction lists when required.

4. Check that any R/Ses were recorded clearly and noted at the front of PC folder for future use.

5. Ensure that an Integrity Processing Repair List (L1R) is used if session ends with no F/N or PC at all upset or gets sick shortly after Integrity Processing. Examiner 24 Hour Rule must be rigorously applied.

No. 1 above is of prime importance. Don't permit Auditors to go into some unusual solution such as checking the question after it has been taken to F/N. That could wreck a case. The Auditor simply audits, keeps the PC on the right chain going earlier as necessary to an F/N. It is the C/S who checks to see that it was in fact the question being asked that F/Ned. This is done by checking for any non-sequitur answers that F/Ned on some other

subject.

If a person falls on his head after an Integrity
Processing session an L1R is given. However an FES to
find missing questions that F/Ned on something else is
done.

The whole essence of this is contained in F/Ning every
item; getting question asked to F/N, not some other;
Integrity Processing Hi-Lo List; Integrity Processing
Mid-Session List; Integrity Processing Repair List L1R;
fines for missing witholds; and Expanded Dianetics for
R/Sers (revealing and recording R/Ses and R/Sing state-
ments for later use in Exp Dianetics). This is what has
made this a major new tech that gives fabulous case gains
too.

It is the duty of the C/S to ensure the tech is known
and correctly applied.
