Cramming Series No. 21R

CRAMMING OFFICER POST REQUIREMENTS

A Tech Cramming Off is not only a top Auditor for his Class but he must also be a top Supervisor.

The __minimum__ requirements for being a Cramming Off are:

A. Experienced Classed Auditor of Class IV
    HDC or above in a lower Org and not lower
    than VIII in an SH or AO Org.

B. Mini Course Super Course.

C. Trained Word Clearer.

D. Trained in the skills of Cramming and
    Why Finding per the BPL 12 June 73
    Cramming Off Hat Checksheet.

Whilst it is known there is a lot of good Cramming being done in Orgs, the quality of Cramming needs to be increased in order to back up the current expansion occurring in Orgs.

The Cramming Off is second only to the Qual Sec in technical quality and post expertise.

In order to upgrade Cramming quality, the following should be done:

A. Get the current Cramming Off completed on
    all post requirements and operating efficiently.
    He handles tech and admin cramming.

B. Post a Deputy Cramming Off who apprentices
    under the current Cramming Off, takes over
    the post, allowing the current Cramming Off
    to be sent to a higher Org for advanced Tech
    training and HPCSC.

C. When the first Cramming Off returns, he takes
    over, and the second Cramming Off goes to the

higher Org for OEC and HPCSC. The 1st
Cramming Off retreads Cramming expertise
materials and Why Finding as part of staff
training daily.

D. The second Cramming Off returns and takes
on the post of Admin Cramming Officer. He
also retreads Why Finding and Cramming
expertise.

And thus, we have expert Tech and Admin Cramming
Officers on post.

A busy Cramming Off needs a Qual Page to get people
in for their Cramming cycles and High Crime checkouts,
otherwise he can waste valuable minutes and hours chasing
up people. The Qual Page can also get needed PC folders
or packs and materials from the Library as a service to
the Cramming Off.

The high degree of personal attention in Cramming
brings about a situation whereby a Cramming Off can handle
about 20 students at one time before he will tend to
become overloaded. In this case, a second Cramming Off
must be added to reinforce the area. The Qual Sec and
Org Off must be alert to this or the area will get jammed
and production lines slowed.

The target being worked towards is:

1. A Class VIII or IX Ex Dn HPCSC Tech Cramming
Off.

2. A Class IV OEC HPCSC Admin Cramming Off.

Then you would really see the fur fly. As these
levels of post training are acquired, we will see a gradient
and continual improvement in the tech and admin quality,
existence of Source, and use of the materials of Dianetics (R)
and Scientology (R) in Orgs.

Orgs will become fully On Tech, On Policy and In
Ethics and will be truly KEEPING SCIENTOLOGY WORKING.
