ARC BREAK HANDLING

(Data from LRH C/S of 13 Feb 1972)

Here is some additional expertise on the ARC Break Rudiment from an LRH C/S:

"Auditor assesses ARC Brk incorrectly:

A sF /  
R x x  
C F x  
U x x

(The Auditor) "is doing it by elimination, doing it twice because of a possible instant read fault.

"You assess it once, ask the pc if it's right, if he says no, rehandle. If yes, give it to him."

CDEINR follows the same rule.

"Assessing by Elimination is done on double (2 item) reads. But a hot auditor does it on best largest instant read."

The auditor that knows his business does not miss the read, the pc will also brighten up, even if ever so slightly, on the very first assessment. PROVIDED THE RIGHT ITEM HAS BEEN GOTTEN.

Sometimes the pc will originate, "Yes, I guess it was R, but to me it really is more a break in communication," (for example). The wise auditor then says "Thank you" and indicates the "C."

Any goofing auditor should go to Cramming.
