TRs TRAINING BREAKTHROUGH

LRH has been recently coaching, on tape, the TRs of Flag Auditors and Internes for many weeks. Each night messengers have been lugging in a great batch of tape recorders, each containing one or more auditing tapes.

Some real breakthroughs were made on TR training that have never been seen or released. The Tech of making an assessment really impinge and read was completely wrapped up.

Pc's, very early in this, began to comment that their Auditor was "Much better".

The Auditors had a great many wing wins.

They are released here for your use in upgrading the quality of your org's auditing.

TYPES OF TRs

There are two different types of TRs. These are General TRs and Assessment TRs. General TRs are for use in regular auditing. They are natural, relaxed, while fully controlling the session and the pc.

Assessment TRs are used to get a list to read. Assessment questions are delivered with impingement, the Auditor accenting or "barking" the last word and syllable. An assessment is done crisply and bussinesslike with real punch (not shouting) so each line is TO the pc. This is not to say that an assessment is done Tone 40 or with antagonism. It's friendly but bussinesslike and impinges

TRAINING TIPS

In training Auditors and Internes, the person supervising the TR Training and tapes trains them first on General TRs to a pass. A full TRs pass requires both.

All previous tape cover notes to the Supervisor and his comments should be attached together in sequence so he can see that progress has been made and which points are being worked on.

Care must be given to ensure that the Auditors learn how to set up a tape recorder, position the mike so the auditor and the pc can be heard easily and keep the heads clean so that recordings are not faint but easily audible. The proper position of the mike is either hung from the ceiling a bit to the side of the auditor and pc with the mike at the same height as the Auditor's face, or sticking out from under the meter shield.

A poor recording is as worthless as an illegible auditing report.

The person supervising the TRs tapes (usually the Interne Super with a final pass by the Senior C/s or KOT) must not invalidate or evaluate for the Auditors but must use lots of encouragement and ARC. When an Auditor Backslides the Supervisor must tell him not to backslide and see that the Auditor is sorted out and improving again.

This TR training is not a pattycake affair, but must be demanding and tough enough to get auditors through it. Pc results are at stake. LRH has when warranted, ordered an auditor to 12 hours a day TR Training and increased it to 14 hours a day to bring up the Auditor's necessity level and get him through it when he had been lagging and was overdue to fire to his org.

GENERAL TRs TRAINING

Tools used in general TR Training were LRH model auditing tapes, lots of Word Clearing, use of the TR Booklets, study of Original Thesis Primary Axioms (Chapter 2) and the rules that permit engram running (Chapter "The laws of returning"), use of Mood Drills (later described), drilling out attitudes about pcs that interfere with the session, knocking out automatidities by having the Auditor drill doing them causeatively and the TRs themselves.

In knocking out faulty or inconsistent TRs, the tech used is to drill the entire scale from one extreme to another up and down. For example: Auditor has a problem with loudness and tends to mumble - have him drill the faulty TR1 or 2 on a gradient from the barest mumble to Tone 40 and back again until it is cured,

The idea is to get general TRs up to a level of real polish and consistency (not just barely passing one tape) so they are live, natural, interested in the pc, delivered TO the pc, relaxed and smooth.

USE OF TRO

TR 0 is ordered when it is obviously out, or when other TR drills dont seem to be resolving.

TRO is used so that the auditor can be with the pc easily, is comfortable in session and not anxious or impatient. TR0 is ordered done where there is not much auditor there in session.

TRO was ordered in recent TR training when the following showed up in the Auditor's tapes: when an Auditor was clearing his throat, when an Auditor was fumbling assessment lines, when TR 1 and 2 were way out and not improving, when an auditor went mechanical in session, to handle a timid auditor, when an Auditor's mood wasn't resolving with mood drills, when the pc was unaware of the Auditor and wasn't working well in session = not much Auditor there.

TR 0 can also be used with Mood Drills and when knocking out an auditor attitude that is interfering. What is usually ordered is to have the Auditor look over his attitude to pcs and drill that attitude to free it up, then practise other attitudes. And also do TR 0.

TR 1

TR 1 in general TRs must be friendly and real, natural, positive with each command given in its own unit of time. Poor diction can get in the road and have to be drilled out. TR 1 must also be live and interested with adequate volume and crispness to arrive at the pc. Commands must be given without hesitation or being slowly dragged out because that gives a slow session pace and violates the rule on number of commands given and answered per unit of time determines gain.

A lilt on TR 1 loses any impingement the question could have. It can be cured by drilling lilted and then the opposite, monotone, until the automaticity is broken.

The opposite of this is where the Auditor drops the end of the line or swallows it. This also loses impingment and must be drilled out.

An Auditor whose TR 1 is too soft and low volume can be ordered to do 50 foot ~~drills~~ TRs.

A breathless TR 1 can be cured by having the Auditor practise being breathless to get rid of the automaticity.

A timid Auditor can practise being a mean tiger to get the softness out of his TR 1. He should also review the Primary Axioms of Original Thesis.

Timing is an important part of TR 1. Session pace depends on it. Where commands or questions are too far apart auditing time is extended.

Flubbed commands are out. Having to re-read a command is a flub and shouldn't be necessary if the Auditor drills the procedure so its smooth.

When taking questions or commands from an HCOB the Auditor can sound like he's reading the question and must learn to sound like he's saying when he's in fact reading.

These were some of the points picķed out on TR1.

TR 2

"The essence of TR2 is session control". "The pc's comm is begun with TR 1 and controlled in flow with TR 2". (LRH). There are really differrent types of TR 2, a whole range that go from a $\frac{1}{2}$ ack to a full ack up to a Tone 40 ack.

"A full ack is really a stop ack. If you break it down, there's a degree of acks going from 'go on, I'm listeneing' order mutter to an 'okey, that's enough of this phase of this' to 'well we got through with that and that's it'. One doesn't use such words. It is done by tone and intention. It's called session control. There's also a Tone 40 ack which ends off the whole scene and that's that." (LRH).

"A half ack keeps the pc going and also keeps a pc from ever itsaing ". "Half ack when it is going to go on, like Earl Sim". (LRH) You use half acks to show the pc you are still there and to let him know you're interested.

On R3R you use $\frac{1}{2}$ acks on 1 to 8, full ack on 9, $\frac{1}{2}$ acks on A?to C and a full ack on D.

Where a pc ever itsas it is caused by a slow TR2, a lack of TR2 especially $\frac{1}{2}$ acks, too streng a $\frac{1}{2}$ ack and ever acking. A lack of $\frac{1}{2}$ acks shows up with a pc who is unaware of the Auditor and so is out of control or doesn't work well in session.

Practise on $\frac{1}{2}$ acks and full acks so as not to fall between and drilling acks that control comm from making it continue to making it stop utterly, the full range of $\frac{1}{2}$ acks to full acks to tone 40 acks, cures anAuditor who flubs on the above.

Where TR2 is interuptive and overrides the end of the pc's answer, it will put the pc on a withheld. Practise on timing of TR 2 and perception of when the pc has said all corrects that.

Double acks, multiple acks such as: "OK Good". and "All right Thank you OK." are not OK and must be knocked out by drilling the Auditor so he learns to ack with one ack. TR 2 repeated makes an overack.

Too cold a TR 2 can be corrected by Mood Drills (see below). TR 2 expresses mood and interest in the pc's incidents and itsa. TR2 must be T0 the pc so he gets it.

Sometimes an Auditor has TR 2 and the next TR 1 colliding, running together

so that they nearly overlap. This is corrected by drilling timing of TR 1 and 2 and the next TR 1 so that each TR 1 is in its own unit of time and each TR 2 ends that comm cycle.

Use of LRH model auditing tapes is necessary in training Auditors on TR 2.

MOOD DRILLS

Mood drills were developed by LRH to handle stuck or fixated Auditor moods or where some auditor's mood entered into the session would rough up or upset a pc or slow his progress.

Mood drills consist of TRs 1 to 4 done out of session on each tone level of the full tone scale, hitting each mood up and down the scale. The coach calls the mood, the Auditor does the TRs 1 to 4 in that mood. It doesn't really require much coaching.

"you just start low in the scale and TR that mood then the next, then the next. Like all TRs done "hopeless", etc. Lots of laughs doing it really. Doing TRs as a dead Auditor is pretty tricky." (LRH)

An Auditor drilling these must beware of mis-U's and make sure that he understands each mood (tone). Any moods that are too easy to do or too hard should be spotted by coach and auditor and repeated until the automaticity is broken. Once begun mood drills should be continued until the whole scale is flat so the Auditor doesn't get stuck on the Tone Scale but can do any mood easily and without strain.

Trs are a matter of sound not how an Auditor feels." (LRH)

Where an Auditor is upset about his voice you can have him try - out of session - speaking melodiously, boringly, enthusiastically, until he can change his mood about at will.

Mood drills can be done on TR 104 when R3R is mechanical, brush off, not interested or done with a set emotion. You have the Auditor drill TR 104 by mood, up and down the tone scale, and TO the pc. The coach calls the mood as with Trs 1 to 4.

50 foot mood drills can be used to cure a fixed mood that doesn't seem to budge with regular Mood Drills.

A timid Auditor is cured with 104 at each mood level including doing it as a panther, a lion, aggressive. As a bird, scared stiff. This breaks the automaticity.

Mood drills can be done on Assessments where the Auditor's mood would rough up the pc, where the assessment has an up lilt, or when its dull or monotonous or when its an out mood of any sort that's fouling up the Auditor's assessment. The Auditor can be drilled on assessment in the E-Meter Drill book at different moods or he can use a prepared list in a dummy session at different moods.

Mood drills can also be used to fix up a TR 1 that's too variable or rushed, on a set emotion, choppy, pushy, monotonous, sad, dreary and even on TR2 when it's an out mood.

Mood drills are not only fun to do but also enable an Auditor to pass off a session without strain and without his own feelings interfering with it. The session will sound live, the Auditor will be interested in the pc and with good TRs get maximum pc gain.

ASSESSMENTS

Assessments are done to impinge and get a meter to read. The Auditor barks the last word and the last syllable so it does impinge. You don't go _____, _____ . Go _____/ , _____/. You don't drop your voice or downcurve your voice tone at the end of the line as that will cost you reads. You punch the last syllable to make it read, and TO the pc.

The accent is at the end of the sentence routinely, not on the earlier part. This must be drilled, drilled, drilled until the Auditor can do it easily and consistently with good bark.

A lot of automaticities will come off with the drilling and it may sound "strange" at first but you'll be surprised at the reads you otherwise wouldn't get. An example is the line "Were you ashamed to cause an upset" (usual emphasis underlined) which when assessed goes "Were you ashamed to cause an upset" (bark on last syllable).

Don't get the idea that assessments are harsh or forceful. You don't have to shout. They must be natural without strain, consistent, friendly but businesslike, with good impingement and bark.

Done as above your assessments will read when they should and not when they shouldn't.

VERBAL TECH

Beware of verbal tech on TR training. You can detect verbal tech when several Auditors are making the same TR errors.

Locate the source of the verbal tech, the "expert" giving advice and knock it out. It can cost you your results.

SUMMARY

Do you want maximum gains for your pcs and maximum results for your Auditors?

Interne Supers, Senior C/Ses, Cramming Officers, KOTs, TRs Supers. Put these drills into effect now. Use them on Auditor and Interne TR training as part of BPL 8 Nov 71 RB Electronic Attestation Form and when correcting TR flubs.

They do not replace the TRs themselves, the TR Booklets or LRH tapes but are used with them.

As a result of Ron's coaching drills above, Auditors began to get rave notices from pcs as to how good the Auditor was suddenly.

Any Auditor can win on these.

Here's to a Golden Era of Tech with real TRs.
