HCO POLICY LETTER OF APRIL 17, 1961

Dist: Staff Hats
D of T, D of P,
Instructors, HCO
Bd of Rev., Hats for
Post & Org Sec.

TRAINING, PROFESSIONAL
NEW POLICY

(Cancels any policy that may contradict it)

The Purpose of the Academy (or an HGC when training staff) is to make the student letter perfect technically before going on to any other training.

Theories and processes can be picked up in books and from tapes as well as in classes. Technical skill cannot be picked up anywhere but in an Academy or HGC training unit, a fact proven by years of observation.

Therefore the 1000 to 1 stress of an Academy (or HGC training unit) must be Technical Perfection.

The following comprise at this writing what is meant by technical skill:

1. Command of the TRs, revised 1961.
2. Command of Model Session.
3. Command of the E-meter.
4. Command of Rudiments detection and process.

All these are covered in Unit 1 of present schedule. Therefore it follows that a student can't get out of Unit 1 until he or she is perfect, if it takes a year.

Don't necessarily keep a professional student in the week he flunked. You can let him go on through Unit 1, (but not to Unit 2). But put on an evening coaching class, paying an evening instructor to teach additional technical subject time.

No student enrolling after the date of receipt of this HCO Pol Ltr. may be given a course completion as a professional auditor until he has been given and has passed an examination as follows:

1. Perfect performance on the TRs 0 to 9.
2. Perfect command of a Model Session.
3. Perfect control and knowledge of an E-meter.
4. Perfect handling of Rudiments and Rudiment processes.

The student must get 100% on the above.

A written examination on the subjects of Unit 2 in HPA/HPS/HCS Training or in the theory taught on a higher course should also be given and must be passed with a grade of 80%.

The Unit One examination may be given when the student completes Unit One.

In examining on Technical (Unit One) the student must be unshakeably confident of his or her skill.

Lack of this skill rather than lack of theory and/or processes has nullified the results of these auditors who have not been successfully taught on 1 - 4 above (Unit One) technical skills.

SOP Goals application has searchlighted the necessities outlined in this Bulletin.

Letting an auditor out of the Academy without the basic skills down perfectly is opening the door to failure.

Be tough!
