LRH COMMUNICATOR AREA

REPORTS TO WW

Anyone proposing the assignment of a Danger Condition to a section, department, division or org which has a high and rising statistic must be reported by the LRH Communicator Area to the LRH Communicator WW by fastest available means.

Proposing or assigning an Emergency Condition to an Affluence statistic is also so reported.

The actual assignment of a Danger or Emergency Condition to a good and rising statistic is prohibited. The LRH Communicator Area as Keeper of the Seals and Signature may not authorize the issue of such a directive and must cancel one if it is issued and must report the matter to the LRH Communicator WW promptly.

A "statistic" means the relative rise or fall of a quantity compared to an earlier moment in time. If a section moved ten tons last week and 12 tons this week, the statistic is rising. If a section moved ten tons last week and only eight tons this week the statistic is falling. Statistics must be graphed weekly by OIC and furnished the AdCouncil Area.

A suppressive society comes down hard on rising statistics. Income tax is only one example among many - the more one earns the harder he is taxed. In short, when your statistic goes up the government stamps down. This is a sure way to bring a society or organization to ruin. A person with suppressive tendencies can always be detected by the fact that he or she stamps only on rising statistics and ignores down statistics.

If Tech completions rise and it is proposed by someone that the Tech Sec be reprimanded for any reason, that suggestion shows a dissatisfaction with a successful Tech Division.

Similarly, Ethics hearings proposed on persons whose section, department or division has a nice rising statistic must be reported by the LRH Communicator Area to the LRH Communicator WW.

Also a number of Ethics Chits being filed on a section, department or division or its personnel while it has rising statistics, should be clamped down on and Investigated by HCO and if it is not, the LRH Communicator Area must report the fact to the LRH Communicator WW.

THE SECOND DANGER CONDITION

Exception = If a senior executive to that portion of the org which is being assigned a danger condition has by his or her own efforts alone raised their statistic after a danger condition was assigned on the previous low statistic and if the senior executive still gets no help in keeping the statistic up, then a new danger condition may be assigned. This exception occurs only when a danger condition has been assigned and relaxed within the past 90 days.

Example: HCO Exec Sec Area gets letter count up by working heavily with letter registrars and so assigns a Danger Condition to the Dissem Division. The Danger Condition formula is followed. After a few days or weeks the HCO Exec Sec Area still has to work with the letter registrars to keep the statistic up. Although the statistic is up, the continued labour of the HCO Exec Sec to keep it up makes a second Danger Condition assignable. This does not have to be reported to WW. But notice it is a second assignment to the same portion of the org within 90 days.

ADDITIONAL REPORTS

The LRH Communicator Area must also report to the LRH Communicator WW the following:

(1) Obstructions to assigning, graphing and reporting statistics for sections, departments or divisions, giving the name of the person obstructing or not complying.

(2) Failure of Secretaries to take Ethics actions on consistent down statistics in their divisions.

(3) Failure of HCO to order investigations and hearings on portions of the org with prolonged down statistics.

(4) Obstructions of reports to the International Executive Director.

(5) Any order issued to inhibit reports to the International Executive Division.

(6) The use of rumours or opinions to assign conditions rather than statistics.

(7) And the most important, as above, proposals or assignments of a Danger Condition to staff members or portions of the org with rising statistics.

#### LRH COMM WW ACTION

On receipt of a report of an effort to assign a danger condition to a rising statistic or a report of any of the above (7) actions, the LRH Communicator WW informs the Executive Director Worldwide who at once directs the matter to the AdCouncil Worldwide for investigation and any action.

In the absence of the Exec Dir WW the LRH Comm WW refers the matter directly to the AdCouncil WW for their next meeting.

The investigation by the AdCouncil WW may take any form and can be very brief if the LRH Communicator Area includes evidence with his report such as a despatch in the person's handwriting or witnessed statements. These would be deemed sufficient to prove the case.

If the person who did any one of the (7) listed things above was a Secretary, the AdCouncil WW should order the AdCouncil Area to convene a Comm Ev at once on that Secretary or take other suitable action.

If the person who did any of the (7) above was an Executive Secretary the AdCouncil WW directs a higher org to convene a Comm Ev, or calls the person to Saint Hill for a Comm Ev or simply orders the person to the org's own Review Department for executive training meanwhile their duties being taken over by a deputy and the person not to act in the post until specifically reassigned to it by the AdCouncil WW.

The same actions may be taken by an AdCouncil Area on a Secretary.

A Secretary may order any of these actions on a subordinate executive doing any of the (7) listed above in his or her division but not retaining the person on payroll meanwhile. The more common action below Secretary would be an Ethics Hearing and demotion or transfer.

#### LRH COMMUNICATOR OMISSION

Any LRH Communicator failing to report as above must be removed from post by the LRH Communicator WW on the omission being proven.

#### SUMMARY

We have here the major fault of any organization or government - it promotes to power persons who then suppress anyone with a rising statistic.

If we pay close attention to this phenomenon our orgs will grow. If we grow careless, and start permitting Ethics actions to be aimed at persons in portions of an org which has rising statistics then we will shrink in size.

A. Reward rising statistics.

B. Stamp on falling statistics.

C. Stamp on those who seek to prevent rising statistics.

D. Bring to view those who do not act in the presence of falling statistics.

That's all there is to guiding an expansion.

So we must:

(1) Have statistics

(2) Follow only graphed statistics, not rumours or guesses

(3) Prevent rising statistics from being squashed

(4) Remove those who find down statistics satisfactory

We don't have all that time to fool about.

So let's use this key to opening the door to a better world. And cure the only real thing wrong with any organization anywhere.
