LRH COMMUNICATOR AREA

REPORTS TO INT HQ

(Revisions in Script)

Anyone proposing the assignment of a Danger Condition to a section, department, division or org which has a high and rising statistic must be reported by the LRH Communicator Area to the LRH Comm Network Int HQ by fastest available means.

Proposing or assigning an Emergency Condition to an Affluence statistic is also so reported.

The actual assignment of a Danger or Emergency Condition to a good and rising statistic is prohibited. The LRH Communicator Area as Keeper of the Seals and Signature may not authorize the issue of such a directive and must cancel one if it is issued and must report the matter to the LRH Comm Network Int HQ promptly.

A "statistic" means the relative rise or fall of a quantity compared to an earlier moment in time. If a section moved ten tons last week and 12 tons this week, the statistic is rising. If a section moved ten tons last week and only eight tons this week the statistic is falling. Statistics must be graphed weekly by OIC and furnished the Ad Council Area.

A suppressive society comes down hard on rising statistics. Income tax is only one example among many -- the more one earns the harder he is taxed. In short, when your statistic goes up the government stamps down. This is a sure way to bring a society or organization to ruin. A person with suppressive tendencies can always be detected by the fact that he or she stamps only on rising statistics and ignores down statistics.

If Tech completions rise and it is proposed by someone that the Tech Sec be reprimanded for any reason, that suggestion shows a dissatisfaction with a successful Tech Division.

Similarly, Ethics Hearings proposed on persons whose section, department or division has a nice rising statistic must be reported by the LRH Communicator Area to the LRH Comm Int HQ and rejected by the LRH Comm.

Also a number of Ethics Chits being filed on a section, department or division or its personnel while it has rising statistics should be clamped down on and investigated by HCO and if it is not, the LRH Communicator Area must report the fact to the LRH Comm Network Int HQ and handle.

THE SECOND DANGER CONDITION

Exception * If a senior executive to that portion of the org which is being assigned a Danger Condition has by his or her own efforts alone raised their statistic after a Danger Condition was assigned on the previous low statistic and if the senior executive still gets no help in keeping the statistic up, then a new Danger Condition may be assigned. This exception occurs only when a Danger Condition has been assigned and relaxed within the past 90 days.

Example: HCO Exec Sec Area gets letter count up by working heavily with Letter Registrars and so assigns a Danger Condition to the Dissem Division. The Danger Condition formula is followed. After a few days or weeks the HCO Exec Sec Area still has to work with the Letter Registrars to keep the statistic up. Although the statistic is up, the continued labour of the HCO Exec Sec to keep it up makes a second Danger Condition assignable. This does not have to be reported to Int HQ. But notice it is a second assignment to the same portion of the org within 90 days.

ADDITIONAL REPORTS

The LRH Communicator Area must also report to the LRH Comm Network Int HQ the following:

1. Obstructions to assigning, graphing and reporting statistics for sections, departments or divisions, giving the name of the person obstructing or not complying.
2. Failure of Secretaries to take Ethics actions on consistent down statistics in their divisions.
3. Failure of HCO to order investigations and hearings on portions of the org with prolonged down statistics.
4. Obstruction of reports to Flag, FOLO or Int HQ.
5. Any order issued to inhibit reports to Flag, FOLO or Int HQ.
6. The use of rumours or opinions to assign conditions rather than statistics.
7. And the most important, as above, proposals or assignments of a Danger Condition to staff members or portions of the org with rising statistics.

As well as reporting these occurrences, the LRH Communicator Area must refuse to OK them when submitted and cancel them if already in effect.

LRH COMM INT HQ ACTION

Where the org or Cont LRH Comm or Int HQ finds serious violations on points 1-7 above and handles, but sees there is tolerance or neglect of these points from Flag or FOLO, LRH Comm Network Int HQ directs the matter to LRH Comm Flag (for Flag) or LRH Comm FOLO (for FOLOs) to be corrected.

All of these points 1-7 are Comm Ev offenses and that includes condoning or tolerating them.

LRH COMMUNICATOR OMISSION

Any LRH Communicator failing to report as above must be removed from post by the LRH Communicator Inf HQ on the omission being proven.

SUMMARY

We have here the major fault of any organization or government - it promotes to power persons who then suppress anyone with a rising statistic.

If we pay close attention to this phenomenon our orgs will grow. If we grow careless and start permitting Ethics actions to be aimed at persons in portions of an org which have rising statistics then we will shrink in size.

- A. Reward rising statistics.
- B. Stamp on falling statistics.
- C. Stamp on those who seek to prevent rising statistics.
- D. Bring to view those who do not act in the presence of falling statistics.

That's all there is to guiding an expansion.

So we must:

- 1. Have statistics.
- 2. Follow only graphed statistics, not rumours or guesses.
- 3. Prevent rising statistics from being squashed.
- 4. Remove those who find down statistics satisfactory.

We don't have all that time to fool about.

So let's use this key to opening the door to a better world. And cure the only real thing wrong with any organization anywhere.
