*A metered examination is given to the preclear after each session or if the pc wants to make any statement concerning his case. Exams are also done after actions such as Word Clearing, Post Purpose Clearing, Crashing MU Finding and False Data Stripping.*

The whole duty of the Examiner is to note the TA and needle behavior of the pc.

This duty is done muzzled. No talk or chatter.

The pc comes in. The Examiner smiles, indicates for the pc to sit down.

The Examiner hands the pc the cans.

The Examiner notes the TA and the needle and looks up at the pc for his statement.

When the pc says what he wants to say, the Examiner says "Thank you very much", and he indicates an F/N or floating TA if he sees one.

The Examiner then indicates with an arm gesture the way out.

This is the whole drill.

To do or say anything else can invalidate the pc and/or lose the F/N he or she got in session. You don't as an Examiner care about anything except TA, needle behavior, statement and pc indicators. The pc will tell you what he wants to. You don't have to ask for it.

If the pc makes some remark or asks a question directed at the Examiner, the Examiner can and should politely acknowledge the pc. (Example: Pc says "How are you today?" and Examiner replies "Fine, thank you.") But the Examiner does not originate any comm during an after-session exam.

The whole idea is that the Examiner must never invalidate or evaluate for the pc by word, attitude or expression.

#### ADMINISTRATION

Part of the Examiner's duty is to keep in accurate and useful admin on all examinations. An Examiner's log must be kept for each exam. It is not necessary to copy the exam report. It is necessary to note who, what for, when, meter phenomena and where sent.

The Examiner is to inform the Qual Sec and Snr C/S of all non-F/N exams and sickness reports.

Also, the Examiner must originate an out tech report, with a copy to the Qual Sec, on each after-session exam where there is no F/N, VGIs.
