Tech Hats

CONFessionIONALS

HCOs may not do Confessionals or "Sec Checks".

HCO may only do Meter Checks. This consists of putting the pc on a meter and noting down the TA, state of needle and attitude of pc.

Where these reads are non optimum (no F/N VGI state of meter) the pc may be sent to Qual for further check.

Too many cases, too many case programmes, have been fouled up by non C/Sed sec checking or confessionals in the past for the practice to continue.

Real criminals may have bad meters but crimes are often so unreal to them that they do not read (meters needle read only on things within the reality or borderline reality of a person). This permits unskilled Sec Checking or Confessional actions to pass right by the culprit.

HCO should learn full investigatory procedure and should only do metering to establish the pc's meter state, asking no questions.

HCO Investigatory Procedure PLs that MUST be known to HCO are:

HCO P/L May '65 - ETHICS OFFICER HAT

HCO P/L 19 Sept '70 - Data Series No.16, INVESTIGATORY PROCEDURE

HCO P/L 19 Sept '70 Issue 11 - Data Series No.17, NARROWING THE TARGET.

TECH & QUAL

Asked to do "Confessionals" or "Sec Checks" Tech and Qual may do them only as part of a C/S programme and only as a gradient in the general action of improving the reality of the case.

An R/S still means crimes. All the other data is true and should be known but POLYGRAPHS, LIE DETECTORS, METERS ONLY REGISTER AT THE REALITY LEVEL OF THE BEING, and the reality level of a criminal is too bad for reads to occur in a majority of cases. Thus the guilty are falsely freed and the innocent are subjected to annoyance and upset.

Overts, crimes, etc may come off first as a critical thought under which lies a harmful (overt) act. On such gradients one builds up reality and so releases overts.

No meter or sec check or Confessional is sufficiently valuable to use in detection of crime. The state of the meter itself is of value since it tells one whom to investigate.

Thus neither Tech nor Qual should assist investigations but should work on the case against proper C/Ses to get off the overts and witholds for the case benefit.

Overts disclosed in sessions may not be used for justice purposes. Therefore only crimes discovered by routine investigation are actionable.

It could be that a crime discovered by investigation is also gotten off in session. That it was also gotten off in session does not protect the person from discipline. That it was gotten off in session is irrelevant and sessions are not part of justice procedures.

(This is duplicated and relayed to you by your Continental Org at Los Angeles.)

SICKNESS

The broad general clues about suspects are:

The person with the worst meter (TA and needle state) is the most suspect.

The person whose job product is itself an overt act is the most likely to commit other crimes.

The person who is most crazy is the most likely to be the guilty one.

The person who is chronically ill is a suspect.

These are true because the cause of insanity and sickness is overts.

The person who acts most "PTS" is the one who has most harmed his fellows.

The person with the worst stats is the most likely suspect.

Beyond these technical observations one cannot go in the field of justice.

HCOs should learn Investigatory procedures when looking for criminals.
Confessionals and Sec Checks will fail them and they also mess up cases.
Investigatory procedures are quite good enough.
