"Paid Releases, Clears & OTs  
LRH Comm Statistic"

PAID RELEASES, CLEARS & OTS  
STATISTIC

(NOTE: This PL has been updated to include additional valid Release attainments, in line with the new Classification and Gradation Chart.)

The statistic of Paid Releases, Clears and OTs comprises:

Method 1 Word Clearing Completion  
Life Repair Completion  
Objective Processing Completion  
Drug Rundown Completion  
CS-54RD Completion  
Recall Release (ARC Straightwire)  
Standard Dianetic (R) Case Completion  
Communications Release  
Problems Release  
Relief Release  
Freedom Release  
Ability Release  
Expanded Dianetics Completion  
Power Release  
Power-Plus Release  
Grade VI Release (R6EW)  
Clear  
Each OT Level

All processes and all 3 flows as necessary to declare a person for a Release, Clear or OT Level must be run.

If Expanded Grades are done on a previous Release or OT, the attainment of each Expanded Grade counts on the statistic.

The statistic is counted one for one - one point for each item listed above. Each of these is a valid technical completion for the stat of Paid Releases, Clears and OTs.

USE OF THE STAT

This statistic indicates whether or not the org is producing completions, and making full and correct use of valuable org auditing hours by exact application of HCOBs. And by relating this stat to other GDSes, it can be seen whether or not the org is there and functioning. By further analysis of GDSes and by observation of the Divs concerned, it can be seen which areas need what LRH EDs, PLs, HCOBs, exactly applied in order to remedy the production and organization and establishment faults which hold the Releases stat down. Remedying this will increase all GDSes.

### RAISING THE STAT

It should be noted that an order such as "push training" will if competently executed raise Releases since the best auditors trained will work in the Org either as internes or Staff auditors (or both) and by the excellence of their training deliver excellent results which will increase demand for processing. The continued push on training will increase the rate of flow. Excellently audited PCs will become excellent auditors who produce results on PCs.

Further study will show how all GDSes relate to the org's VFPs and stats and how the way to maintain a high Releases (and Clears and OTs) stat is to enforce standard policy form and actions throughout the org, always bearing in mind that Releases are produced by well-trained Auditors.
