# CORRECT DANGER CONDITION HANDLING

DANGER CONDITION

DANGER CONDITION—
RESPONSIBILITIES OF DECLARING

HCO PL 19 Jan. 66 III

When the correct formula for handling a Danger condition is not done, an org or activity or person cannot easily get above that condition thereafter.

When we had the 2nd Danger Formula, apparently it was applied but the real Danger Formula wasn't. This made some orgs and people remain in or below Danger and made it very hard for them to get above that state.

A prolonged State of Emergency or threats to viability or survival or a prolonged single-handing will not improve unless the actual Danger Formula is applied.

#### DANGER FORMULA

The original formula follows:

- 1. Bypass (ignore the junior or juniors normally in charge of the activity and handle it personally).
- 2. Handle the situation and any danger in it.
- 3. Assign the area where it had to be handled a Danger condition.
- 4R. Assign each individual connected with the Danger condition a First Dynamic Danger condition and enforce and ensure that they follow the formula completely, and if they do not do so, do a full Ethics investigation and take all actions indicated.
- 5. Reorganize the activity so that the situation does not repeat.
- 6. Recommend any firm policy that will hereafter detect and/or prevent the condition from recurring.

The senior executive present acts and acts according to the formula above.

A Danger condition is normally assigned when:

- 1. An Emergency condition has continued too long.
- 2. A statistic plunges downward very steeply.
- 3. A senior executive suddenly finds himself or herself wearing the hat of head of the activity because it is in trouble.

#### FIRST DYNAMIC FORMULA

The formula is converted for the first dynamic to:

- 1st 1. Bypass habits or normal routines.
- 1st 2. Handle the situation and any danger in it.
- 1st 3. Assign self a Danger condition.
- 1st 4. Get in your own *personal ethics* by finding what you are doing that is out-ethics and use self-discipline to correct it and get honest and straight.
- 1st 5. Reorganize your life so that the dangerous situation is not continually happening to you.
- 1st 6. Formulate and adopt firm policy that will hereafter detect and prevent the same situation from continuing to occur.

#### JUNIOR DANGER FORMULA

Where a Danger condition is assigned to a junior, request that he or she or the entire activity write up his or her overts and withholds and any known out-ethics situation and turn them in at a certain stated time on a basis that the penalty for them will be lessened but if discovered later after the deadline it will be doubled.

This done, require that the junior and the staff that had to be bypassed and whose work had to be done for them or continually corrected, each one write up and fully execute the FIRST DYNAMIC DANGER FORMULA for himself personally and turn it in.

#### **ASSESSMENT**

If the necessity to bypass continues or if an area or person did not comply, use a meter and assess or get assessed the following questionnaire.

# THE TROUBLE AREA QUESTIONNAIRE

## WHY

The above questionnaire can also be used to *help* find a Why (it will not directly find one as the Why has to be rephrased for each individual).

A Why should always be found for individuals in a Danger condition.

### **ENDING A DANGER CONDITION**

When production has again increased, the Danger condition should be formally ended and an Emergency condition assigned and its formula should be followed.
